No. 8-77

**TITLE/SIGNIFICANCE:** Missile System Component Calibration Facilities are being deployed at or near Rail-to-Road Transfer Points at missile complexes deploying the SS-17, SS-18, and SS-19 missile systems.

**COMMENT:** A T-shaped calibration building was identified at four missile complexes, and a rectangular calibration building was identified at eight missile complexes. At one end of each of these calibration buildings is an instrumentation room with three large pedestal support positions. On three sides of the room are narrow horizontal slit type windows which sight towards at least six exterior calibration monuments. These monuments which are at various distances from the calibration building are raised to a line of sight elevation. They are constructed with large concrete bases and are connected to the calibration building by underground cable.
